Numerical-Subject Listing of Documents in Class 8 Records  1

Subject Index for Class 8 Records  21
The National Archives and Records Administration has published on microfilm the U.S. Department of State Decimal File 863, Records Relating to the Internal Affairs of Austria, for the years 1945 through 1949.

The materials in this Decimal File have been microfilmed in the exact order and condition in which they appear in the holdings of the National Archives and Records Administration. Those documents that have not yet been declassified were removed from the file prior to filming and have been replaced with notes indicating their absence.

Decimal File 863 is part of the General Records of the Department of State, National Archives, Record Group 59.

The documents in this file are primarily instructions to and despatches from U.S. diplomatic and consular staff regarding political, economic, military, social, and other internal conditions and events in Austria. Other types of material represented are reports and memoranda prepared by State Department staff, communications between the State Department and foreign governments, and correspondence with other departments of the U.S. government, private firms, and individuals.

THE DECIMAL FILING SYSTEM

From 1910 to 1963, the State Department used a decimal filing system to organize its central files, which consequently became known as the Decimal Files. This filing system is designed to permit access to documents by subject. It uses a numerical-subject organization that has three major parts: Class, Country, and Subject.

Class. There are nine numbered classes in the decimal filing system of this period, each of which designates a very broad subject area. These are:

Class 0: General, Miscellaneous
Class 1: Administration, U.S. Government
Class 2: Extradition
Class 3: Protection of Interests
Class 4: Claims
Class 5: International Conferences, Multilateral Treaties, Disarmament, League of Nations, and Interparliamentary Union
Class 6: Commerce, Customs Administration, and Trade Agreements
Class 7: Political Relations of States
Class 8: Internal Affairs of States

The records reproduced in this publication are from Class 8.

Country. The decimal filing system continues by assigning a number to each country, as well as to some larger geographic areas. The United States, for example, is always represented by the number 11. The country number for Austria is 63.

Subject. Class 8 records are organized according to a very precise subject classification system, in which each subject is assigned a number. The generic numerical-subject classification for Class 8 records begins on page 1 of this Guide, and an alphabetical subject index begins on page 21.
File Periodization

The State Department divided its Decimal Files into arbitrary sections by date: 1910-1929, 1930-1939, 1940-1944, 1945-1949, 1950-1954, 1955-1959, and 1960-1963. Each section is treated as a separate filing unit, organized by the numerical-subject classification system. Within each section, therefore, all the documents pertaining to a particular subject are filed together. It is important for researchers to remember that Decimal Files are organized in these multyear sections and cannot be accessed by individual year.

Document File Numbers

In the decimal filing system, each document is assigned a file number that reflects four pieces of information. An example, using a document in Decimal File 863, is shown below:

8 63 . 24 / 446

1 (2) (3) (4)

(1) Class Number. This document is part of Class 8, pertaining to internal affairs of states.

(2) Country Number. This document is assigned the country number for Austria, which is 63.

(3) Subject Number (always follows the decimal point). The numerical-subject classification for Class 8 records is given on pages 1-20 of this Guide. In this example, the subject number 24 refers to "military equipment and supplies." Subject numbers may consist of any number of digits and may be combined with letters or words. For instance, 874.114 Narcotics refers to the subject of traffic in liquor and habit-forming drugs and the subdivision of Narcotics.

(4) Document Number (always follows the slash). As they were assigned to a subject group, documents were numbered consecutively within that group. In this example, the document was the 446th to be received on the subject of military equipment. Researchers should note that occasionally documents were numbered by filing date rather than date of receipt, so the files are not purely chronological.

The Purport Cards

Beginning in 1944, the State Department prepared Purport Cards for each Decimal File. This card file records each document as it appears in the file. For each document, the card provides the document number, the place of origin and often the author, the date of origin, the divisions and offices within the State Department to which the document was forwarded, and an abstract of its contents or basic subject.

In this microfilm publication, the Purport Cards corresponding to the documents on each roll of microfilm are included at the beginning of the roll. This serves as a convenient roll "table of contents." Researchers should note, however, that there are occasional discrepancies between what is listed and what actually appears in the file.

A Purport Card and a first page of a document are located on pages viii and ix of this Guide. These samples have annotations pointing out the location of specific information that researchers may find useful.
USING THE MICROFILM

Locating a Document by File Number

When you know the file number of a document and wish to locate it on the microfilm, follow these steps:

1) Go to the microfilm Roll Contents beginning on page x of this Guide. The Roll Contents gives the file number of the first and last document on each roll. Using this information, determine the appropriate roll.

2) Place this roll on the microfilm reader. Remembering that documents are filed in numerical order, turn to the desired document.

Locating a Document by Subject

When you want to examine documents addressing a particular subject, follow these steps:

1) Check the subject index for Class 8, located on page 21 of this Guide, to determine the file number of the topic that interests you.

2) Check the microfilm Roll Contents of the appropriate section to determine the roll or rolls of film on which documents with this file number appear.

3) If you have the Purport Lists of the Department of State, you should determine specific documents that seem promising by scanning the abstracts and noting the document file numbers.

4) If you do not have the purport material, you should scan the documents on the subject.

CITATION OF DOCUMENTS

A general form for citing documents from Decimal File 863 is:

[Sender] to [recipient], [date], Department of State, Decimal File 863, General Records, Record Group 59, National Archives, Washington, DC.
SAMPLE PURPORT CARD

From Warsaw

Date of origin: Oct. 5, 1946
Tel. #1559

Confidential

Document number: 860c-00/10-815

File number

Purport of document

Submits report on present political situation and possible future developments.

Division(s) to which document was forwarded:

EUR

10/11

Go/yr
Since the termination of KRN meeting September 21, we have had numerous talks with Poles of various political parties and organizations and with diplomatic colleagues. On this basis these talks and our observation, we submit following conclusions on present situation and on possible future developments:

*Action of KRN in forcing usage of electoral law which in effect permits fraudulent practices in counting votes in coming elections confirms general belief that Provisional Government can control legislative and electoral procedure through strongly handicapped national Council of Homeland. Elimination of Fopol element of Labor Party illustrative of governments intention to remove factors expressing opposition to minority in control. Similar action may be taken at any time against Polish Peasant Party and Molotov personally although because of probability that faked elections might now be held to retain present ruling clique in power, dissolution of PSL may no longer be considered necessary. If we assume rigged elections will be held opposition forces such as PSL would automatically be eliminated from government and from KRN. It is considered possible furthermore, that even members Polish Socialist Party which has recently been taking more independent position than before insisting on local subservient role for Poland in relation with USSR may be eliminated from government after elections are held.*

It is clear...
