NOTE ON SOURCES

The documents in this collection are from Record Group 165, Records of the War Department, General and Special Staffs, Military Intelligence Division Records, G-2 Regional File "Germany." These documents can be found at the National Archives and Records Administration, Washington Federal Records Center, Suitland, Maryland.

EDITORIAL NOTE

University Publications of America (UPA) has microfilmed this file in its entirety. Only duplicate copies of documents, documents that are completely illegible, and copywritten material have been excluded from this micropublication.

INTRODUCTION

The Regional File was a documentary working file established by and maintained for the Military Intelligence Division (MID) of the War Department. Included in this file are notes, memos, letters, cables, and reports from numerous sources, which were used by MID to prepare reports and estimates. MID's reports and estimates were then added to the file. A researcher will find both the raw intelligence and the finished analysis of that intelligence in this file. The Regional File was established in the summer of 1940 and discontinued in June 1944.

Organization of the Regional File

Material in the Regional File is arranged by country. All documentation for a country is then arranged by the War Department's Index Guide for Military Information, Appendix B to Standing Instructions to Military Attachés (M.I.D.—SR 30-35). The introduction to the Index Guide is reproduced below; it should be noted that paragraph 3 states that the Index Guide is not a filing system. Nevertheless the Index Guide numbering system was used as a filing system for the Regional File. Appendix B to M.I.D. — SR 30-35, Index Guide for Military Information, was published in June 1940, and was in effect until June 1944.

INDEX GUIDE FOR MILITARY INFORMATION

1. This revision of the Index Guide is an integral part (Appendix "B") of Standing Instructions to Military Attachés (SIMA).

2. The Index Guide is a classified arrangement of the information necessary to the Military Intelligence Division in acquiring and maintaining material from which Digests of Military Information derive, and from which the combat, economic and political estimates can be kept current.

3. The Index Guide is not, and should not be regarded as, a filing system. It is, rather, the military attaché's broadest and most permanent directive. To this end, in this revision, the outline material under each number has been carefully studied and redrawn, with, as its primary objectives, the focussing of the attention of the observer on specific problems, and the removal of duplications in the material requested. A secondary, though important, factor in the revision of the material, and especially in the arrangement of underlined subheads under a single index guide number, has been the problem of prompt and convenient dissemination to the several War Department agencies. Only moderate weight has been given to the consideration of convenience in filing, although it is evident that the ability to locate quickly the material on a particular subject must be based on a uniform system of recording it.

4. Since the Index Guide is designed to apply to all countries, its range is extremely broad. It is not expected that all of the topics listed will be covered in the information collected relative to any one country. It is fully realized that even the strictly military portions of the Index Guide will not exactly fit any one country. Since no two important military systems are exactly alike, any method of classification perfectly adapted

to one foreign army would be as difficult of application to another as would be that of the United States. Consequently the American military thought has been made the basis.

It is likewise realized that the entire orientation of the military attaché's efforts will vary with the country. Obviously, in the case of countries with highly developed and well equipped military forces, our primary interest will lie in those military forces, and in the technical military lessons to be derived therefrom. When such countries are at war, the trends developed in strategic doctrine, tactics, organization and materiel assume still greater importance.

On the other hand, in such cases as those of the American Republics, the absence of large and well equipped military forces naturally operates to reduce the amount of detailed technical military information required concerning them. The possibility, however, of military cooperation in those areas necessitates the maintenance of up to date information on which precise plans can be based. Effort should be concentrated on the information that would be required by all members of the staff of the commander of an expeditionary force operating in the areas lying within this hemisphere. Furthermore, information on such countries is not nearly so readily obtainable from outside sources as in the case of better known and more highly developed nations, and in consequence the economic and sociological sections of their Digests are of relatively greater importance.

However, even in the cases of highly developed countries, where our primary sources of economic information are the Department of Commerce agencies, and of political information the State Department, it should be noted that in many numbers of the economic and political sections of the Index Guide are items developed essentially from the military standpoint, as, for example, the delineation of the vital areas of the country under 4000, and of their physical features under 1180, the request for information of vital and key points in industries, communications and utility systems, etc. Such sections should receive due attention from all military attachés.

Listed below are the ten major subject classifications arranged by the index guide number.

1000	Geography
2000	Population and Social Conditions
3000	Political
4000	Economic
5000	Finance
5900	National Defense
6000	Army
7000	Navy
8000	Air-Civil and (Non-Military) Governmental
9000	Air-Military

Each primary classification was then broken down into more specific subject classifications. In addition, a general or miscellaneous segment of reports was maintained either at the beginning or the end of each country file.

REEL INDEX

The frame number on the far left side of the page identifies where a specific item begins on the microfilm. Beginning on page 7, the number following the frame number reflects the Index Guide Number, as assigned by the War Department. (See Introduction on page v for a further explanation.) The user is provided with an explanation of the type of material found in each Index Guide category, as signified by the smaller type following each guide entry title.

Population and Social Conditions

- 0219 2000 **Population and Social Conditions—General**
The historical origin of nation—by martial conquest or revolution, by political combination (voluntary or imposed), or by colonization and growth.
Chief influences on national growth in population and on the development of the social system, with figures showing total population at intervals over long periods of time.
Mass repatriation of nationals.
Mass expulsion of foreign nationals.
Results of the above factors on the present characteristics of the population, its sociological order and standards.
Racial composition in round numbers, or percentages of total population represented by each element without regard to citizenship.
Note: This number is intended to cover population from the historical, long-range standpoint, with just enough on general racial composition to complete the general picture. Detailed statistics on population are reported under 2010, and details of ethnic, social, and immigrant groups and minorities are reported under 2020.
- 0275 2010 **Population and Social Conditions: Population and Vital Statistics**
Contains all readily available population and vital statistics.
Statistics in tabular form of total population for the country as a whole, for each next largest political subdivision, for each colony and protectorates, and for the cities reported under 1190 as being important from a military or political viewpoint.
Statistics for the country as a whole showing number of males and females, number of males of military age, number of residents of foreign extraction by country of origin and subdivided into citizens and aliens.
Totals for important occupations.
Average density of population.
- 0352 2020 **Population and Social Conditions: Important Ethnic and Social Groups and Minorities**
Discusses the important ethnic and social groups and minorities, including those resulting from immigration. Includes statements on relative importance, availability and aptitude for military service, and the degree of loyalty to be expected of them. Show location of important groups on outline maps, when practicable.
Note: The political treatment of all such groups is reported under 3500.
- 0500 2050 **Population and Social Conditions: Immigration and Emigration**
The government policy that controls.
Statistics, annually, arranged according to age, sex, and country of origin or destination, of immigrants and emigrants, with comments upon the chief political, economic, or other factors influencing the flow.
Naturalization laws.
Note: The areas of colonization, the importance, availability and aptitude for military service, and loyalty of immigrant groups are reported under 2020. Their political treatment is reported under 3500.
- 0535 2100 **Characteristics of the Population: General**
Influence of tradition and custom.
The characteristics of the population: temperament (e.g., phlegmatic or dynamic), respect for authority, capacity for self-government, conservative or radical tendencies, credulity, nationalistic spirit, moral stamina and fortitude, intelligence, courtesy, hospitality and neighborly traits, physical endurance and courage, and aptitude for military service.
Racial attitude toward foreign nationals and foreign governments.

Indicate the key installations whose interruption would cause material decrease in production or delivery. Vulnerability, landmarks, etc., with maps, sketches or photographs. Annual statistics as (separately) high-octane gasoline, ordinary gasoline, and lubricants, showing: Production, consumption, exports and imports according to countries of destination and origin, and reserves. Total storage capacity. <i>Petroleum Substitutes.</i> Development of substitutes, showing: Processes used, results, by-products, and resources available, separately for: Substitutes for crude oil. Substitutes for refined products.

Analysis of Petroleum Sufficiency.

Analysis of all strategic factors having to do with the supply and requirements of petroleum and petroleum products, with conclusion as to dependence or independence of the country with relation to it. Includes restrictions or rationing and their effect on sufficiency.

Army: General

Concise summary of history and traditions, including the effect of foreign military doctrines.

Mission of the Army as an instrument for the furtherance of national policy. Briefly mentions nonmilitary functions. (Details of such functions reported under proper number elsewhere.)

National defense policy pertaining to the Army. The attitude of the people toward maintenance of an adequate Army Establishment.

General statement describing the Army Establishment and its efficiency as a whole. Discusses briefly the composition, degree of subservience to the central government, state of training and equipment, and relative value of (separately).

Active Army (mentioning its various categories, i.e., home, colonial, native, etc.).

Organized Reserves—similarly classified.

Organized Militia—similarly classified.

Quasi-Military Organizations. (Organizations that reasonably may be considered to form a potential military reserve, as differentiated from those reported as militarized societies under 6040.)

Basic laws affecting Army Establishment.

Note: The discussion of the Army Establishment called for here, is of a brief and summary nature. The organizational composition of the Army as a whole is further discussed in 6100, and the territorial distribution in 6115 or 6905. Tabulated strength figures for all components are reported under 6010. Quasi-military organizations are further discussed under 6020.

0678 6010

Army: Personnel Strength Statistics; Army Establishment

Tabulated strength figures showing:

Active Army, by category, i.e., home, colonial, native, etc.

Commissioned strength, with authorized and actual strength in grade for each arm and service.

Warrant officer strength.

Enlisted strength. For countries employing conscription, it shows the total enlisted strength and estimates the number of professional soldiers.

Organized Reserves.

For active army, with modifications as necessary.

Reports total commissioned strength, total warrant strength, and total enlisted strength.

Organized Militia.

Same for the Organized Reserves.

Summarization giving totals for commissioned, warrant, and enlisted strength of all components above.

Additional Manpower.

Estimates the additional military manpower not included in the above components, classified as to trained (as for instance, in the case of overaged former reservists, or former members of voluntary service armed forces) and untrained. The figure represents the closest possible approximation of the difference between the total military manpower of the country, as obtained from the population figures under 2010, and the sum of:

The total Army strength reported above.

The total Navy strength reported under 7010.

The total Air strength reported under 9010.

The manpower requirements of industry reported under 6620.

[If historical examples of manpower performance are available (e.g., participation in the World War) check figures by comparison, making allowance for changes in population and in allocation to Army, Navy, Air, and industry.]

Note: The organizational composition of each component is reported under 6100.

0882 6100

Organization: General
Peace.

Separately shows the complete organizational composition of the Active Army, the Organized Reserves, and the Organized Militia by tabulating the number of divisions (by type when applicable) and separate nondivisional organizations.

War.

Periodic reports showing complete organizational composition in the manner outlined above.

Note: This number is for organizational composition. Strength figures for all components are reported under 6010. The outline organization of divisions is reported under 6140 and the detailed organization of regimental and smaller units under 6170. Territorial distribution is reported under 6115 or 6905.

0932 6110

Organization: War Department or Ministry

Description of organizations, functions and duties of the War Department or Ministry and the several subdivisions thereof.

Concise comments on the theory and practice of War Department administration as applying to the control and direction of the military establishment.

Note: Reports various divisions of the War Department in accordance with the terminal numbers assigned in the note preceding 6000.

Note: Includes, in the discussion of the War Department General Staff under this number, a brief discussion of the General Staff with troops, and the relation of the latter to the War Department General Staff.

Organization: Territorial and Distribution
Home.

Organization of home country into the principal territorial military districts, departments, or areas, with subdivisions, if any, and general information of administrative or command echelons, showing all subdivisions and military stations. Indicates on maps, major units at each station.

A tabulation of all military organizations included within each district, etc., showing separately active Army, Reserves, Militia, and Colonial Forces, together with total strengths.

Station lists when available.

Overseas.

The general administrative and command organization of overseas commands, reporting each separately.

A tabulation of all military organizations included within each command, showing separately active Army, Reserves, Militia, and Colonial Forces; together with total strengths.

Frame # Index Guide #

Station lists when available.

Note: When either the home country or an overseas possession becomes essentially a theater of operations, reports are suspended under this number (for the area or areas affected) and reported under 6905.

0019 6140

Organization: Divisions

Separately for peace and war, shows the outline organization of each type of division by listing headquarters units, the number and type of the largest units of each arm (except that when the largest unit is a brigade, shows number of regiments) and division service elements. Gives total figures for officers, men, animals, rifles, machine guns, trench mortars, accompanying weapons, artillery weapons, tanks, motor vehicles, wagons, and road space.

Note: Detailed organization, composition, and strength of regimental and smaller units of arms are reported under 6170; of services under 6160.

Note: The number of divisions existing in peace and war is reported under 6100.

Operations.

Developments are reported chronologically, by phase, and by large tactical groupings, such as armies, until the operations begin to resolve themselves into separate campaigns or major battles, from which time each campaign or battle is covered separately. In either event the description or the actual operations should cover:

Objectives.

Influence of terrain and weather.

Tactical employment of the combined arms and of individual arms when noteworthy. *See* Notes 1 and 2 below.

Losses in men and material. *See* Note 3 below. Results from both tactical and strategic viewpoints.

Lessons, comments, and criticisms. *See* Notes 1 and 2 below.

Note 1: Does not go into details of factual subjects definitely covered by other existing numbers, such as equipment, organization, fortifications, etc. Covers them in separate reports under their proper numbers.

Note 2: While Index guide number 6675 has been provided primarily for the forwarding of the lessons and trends in tactical employment as they begin to assume more or less definite form as the result of several or continued operations, really noteworthy material evidenced by a single operation made the subject of a separate report under that number, while Air operations are covered in detail under the 9900 block, enough concerning them being reported under 6910 to show manner and degree of cooperation with ground forces.

Note 3: This refers to the losses for the particular operation reported upon. Periodic reports of total accumulated losses in men and material are forwarded under 6940 and 6945.

Military Aviation

Note 1. This section is used for forwarding information on all aviation used for military purposes, including that attached to, or part of the Navy.

For countries in which naval aviation is part of the Air Force, military attachés will cover naval aviation in such detail as is necessary to complete the data on the entire Air Force.

For countries in which naval aviation is not a part of the Air Force, military attachés will similarly cover naval aviation unless there is a U.S. Naval Attaché accredited to the country, in which case they are relieved from responsibility for forwarding information on the subject, except:

The general information required under 9000.

Information required by the Annual Aviation Intelligence Report.

Information having possible effect on army operations, or on the design of U.S. Army material and equipment.

Note 2. In forwarding information under the 9000 block add - *Army* or - *Navy* to the title for material pertaining to aviation that is an integral part of the Army or Navy, and (*Army*) and (*Navy*) to the title for material pertaining to aviation assigned or allotted to (but not an integral part of) the Army or Navy.

Note 3. The following phases of civil aviation are reported under the 9000 block, adding *-Civil* to the title: Airports—9185; Production of Aviation Equipment—9505; Research and Development—9545.

Note 4. While numbers have been provided in this section for an almost complete and parallel coverage of the subjects outlined in the Army (6000) block, it is not intended that information forwarded under that block be duplicated here. Whenever applicable, as, for example, in the case of such subjects as personnel, pay and allowances, mobilization, etc., covers the subject by a statement that the system or method is the same as for the Army, or by stating the differences that exist.

Production by Model.

Forwarded as part of the Annual Aviation Intelligence Report, statistical information on current and projected production for each model of military plane.

Forwarded under this number is supplementary, interim, and fragmentary information.

Engine Production.

Forwarded as part of the Annual Aviation Intelligence Report, statistical information on current and projected production of aircraft engines adaptable to military use, classified as to whether for service or training.

Forwarded under this number is supplementary, interim, and fragmentary information.

Production of Other Critical Items. (Propellers, Armor, Armament, etc.) (See Note.)

Note: In the case of armament, if the article is designed primarily for air use, its production should be reported under this number; if designed for general use by both air and ground forces, under 6505.

Privately Owned and Operated Plants.

Shows name, capitalization, directorate, location, articles of production, sources of war materials, noteworthy processes or methods, and current and estimated maximum production, by types (both military and civil). Military contracts on hand. Vital points, vulnerability, landmarks, etc., with maps and photographs.

Governmentally Owned and Operated Plants.

Same as for privately owned plants.

Mixed Control Plants.

For plants whose ownership or control is shared by government and private capital, shows relationship and cover as above.

Military Aviation cont.

- 0001 9670 **Strategic and Tactical Doctrines: Tactical Doctrines**
Use of the combined arms of the Air Force.
 Prescribed official doctrines as to the employment of the combined arms of the Air Force, separately, for operations:
 Involving only the Air Force.
 In support of ground forces.
 In support of naval forces.
 Tactical ideas of leading writers and critics.
Use of the individual arms.
 Separately, and in detail to include formations used, altitude, etc., reports the official doctrines as to the employment of:
 Pursuit (fighter).
 Bombardment.
 Reconnaissance.
 Corps and army observation.
 Transport units.
- 0279 9675 **Strategic and Tactical Doctrines: Lessons and Trends in Tactical Employment.**
 Summarizes the lessons learned from, and the trend toward changes in tactical employment as evidenced by the conduct or results of active air operations or of large scale maneuvers.
- 0285 9700 **Training: General**
 General outline of system of training.
 Control, centralized or decentralized.
 Regulations governing training in general, and for each staff, arm, and service.
Note: Details of individual, unit, combined, school and maneuver training are reported under 9710, 9720, 9730, 9740, and 9760, respectively.
- 0304 9710 **Training: Individual**
Training requirements.
Pilots. Shows division of training into phases (primary, basic, advanced, tactical, etc.) with time and general scope of instruction, hours of flying, standards required, percentage of students graduated, total elapsed time required.
Observers, bombardiers, navigators and air gunners.
 General as outlined in the foregoing for pilots.
Number of flying hours required for pilots recalled annually for training.
Recruit training. Time allotted and general scope.
Educational and vocational training. General scope.
Courses at civil (nonflying) educational instructions.
Note: This number is, in general, for summarized material showing training requirements and general scope of instruction. Details of training at Air schools and at civil flying schools that are essentially an integral part of pilot training are reported under 9740. The relative proficiency of personnel in piloting, navigation, combat maneuvers, bombing, etc., is reported under 9200; the general standards of commissioned and enlisted personnel under 9210, 9220, and 9230.
- 0391 9720 **Training: Organizational and Unit**
 Character and scope of unit training for Active Force, Reserves, and Militia, including garrison schools. Mentions specifically the training of crew, flight, squadron, and larger units:

Pilot training, including cross-country flying, night flying, bad weather flying, formation flying, high altitude flying, low altitude flying, instrument flying, and the type of missions assigned.

Gunnery training.

Bombing training.

Navigation training.

Note: In discussing crew training, mentions the degree of emphasis placed on the training of the crew as a unit and the policy as to maintaining intact the personnel of crews.

Note: In discussing flight training, mentions the responsibilities of the flight commander in the training program.

Training: Air School System

General.

Description of system, showing classification of schools, their relationship to one another, to pre-military training in civil flying schools, troop training, and general objective.

Policies governing attendance of personnel of the Active and Reserve Forces.

Policy reference sending of Air officers to, and exchange of instructors with, schools of the Army and Navy.

Number of pilots, observers, gunners, bombardiers, and navigators trained annually.

Individual Schools.

Separately for each school, grouped as follows:

Cadet or Preparatory Schools, including civil flying schools that are essentially an integral part of the Air training system.

Basic, Advanced, and Tactical Schools.

Apprentice, Recruit, and NCO Schools.

Technical and Specialist Schools.

Administrative Schools.

Cover: Name and location.

Regulation and control.

Plant facilities.

Method of selection of students and attendance, all components.

Number, length, and scope of courses.

Noteworthy methods of training.

Efficiency and value.

Note: Training in schools and colleges, and in civil flying schools not essentially an integral part of the Air Force training system, and other pre-military training are reported under 9750.

**Air Operations: Offensive, Not in Direct Support of Land or Naval Forces—
General**

Note: An operation is not in direct support of land or naval forces unless it is directly involved in a tactical operation of land forces as the field of battle, or of naval forces in a naval engagement.

For each operation:

Forces utilized, including any units of Army or Navy attached to the Air Force.
Command or direction, with names of commanders and important staff officers.

General objectives.

Operations.

Arranged as best fits the operations. Where practicable, the developments reported chronologically, by phase, and by large groupings, until the operations resolve themselves into separate actions or raids, which should be separately covered, restating the forces utilized. In either event, the development of the actual operations should cover:

Specific objectives.

Influence of weather and terrain.

Coordination of the air arms.

Employment of each arm (separately):

Bombardment. (Differentiate, when applicable, between light (or dive), medium, and heavy bombardment). Covers:

Noteworthy command and control measures.

Tactics and techniques in attacks against defended and undefended objectives. Mentions altitude, direction, speed, maneuvers, use of clouds for cover, methods of defense against pursuit, methods of avoiding balloon or kite barrages, methods of illuminating objectives during night attacks, and conditions under which horizontal, dive, and glide bombing were used.

Tactics and techniques in attacks against naval and merchant vessels. Mentions size bombs used and percentage of hits.

Losses, by cause, i.e., pursuit, anti-aircraft, fire of ground troops (other than AA), weather accidents, etc. See Note 2 below.

Average number of missions per crew, with flying hours.

Lessons, strategic, tactical, and technical. See Note 3 below.

Reconnaissance. (For reconnaissance over both land and water areas, other than by air units attached to divisions, corps, and armies). Covers:

Noteworthy command and control measures.

Kind of intelligence sought.

Channels of transmission of intelligence for pursuit or bombardment.

Tactics and techniques in both day and night missions.

Losses, by cause. See Note 2 below.

Average number of missions per crew, with flying hours.

Lessons: strategic, tactical, and technical. See Note 3 below.

Pursuit.

Noteworthy command and control measures.

Allocation of pursuit to protection of bombardment, of reconnaissance.

Tactics and technique.

Losses, by cause. *See* Note 2 below.

Average number of missions per crew, with flying hours.

Lessons: strategic, tactical, and technical. *See* Note 3 below.

Note 1: Does not go into details of subjects, such as equipment, organization, etc., definitely belonging to other Index Guide numbers. Covers them in separate reports under their proper number.

Note 2: The losses here are the losses in the particular operation reported upon. Periodic inclusive loss figures are reported under 9940 and 9945.

Note 3: While Index Guide numbers 9665 and 9675 have been provided primarily to record the strategic and tactical lessons as they begin to take definite form as the result of several or continued operations, really noteworthy lessons deduced from a single operation are made the basis of separate reports under those numbers. Similarly, really noteworthy technical lessons, from even a single operation, are reported under 9560 or 9570.

Air Operations: Results and Effects of Aerial Attacks

General.

General observations on results and effects of aerial attacks.

Detailed reports on a single phase of the subject, as, for example, the effect of high explosive on masonry construction, the effect of gas attacks on factory output, etc., when warranted by the information on hand.

Individual Aerial Attacks.

For each attack, or series of attacks, reports results and affects (both direct and indirect) on military objectives, including troops, installations, material, and supplies. Shows in as much detail as possible the comparative effects of bombs, cannon and machine gun fire, and chemicals.

Same for results and effects on civil utilities, installations, and activities, including casualties.

Same for results and effects of attacks on merchant and naval vessels.

Note: Defensive air operations against these attacks are reported under 9925.

Note: When, as the result of actual attacks, changes are made in the general system of military air defense, or in the system of air defense of the civil population, such changes should be reported under the appropriate numbers of the 9800 block.

Note: The effect of aerial attacks on the morale of the civil population should be reflected in periodic reports under 5970.
