V. Danilenko
Senior Research Fellow
State Archives of the Kyiv Region

The State Archives of the Kyiv Region (GAKO) contains materials related to World War II, including documents of the rayon (district) administrations of Kyiv during the German occupation.

The collection described below consists of documents from four out of five district administrations:

Fond FR-2357: Bogdanovka Rayon Administration (2 opis', 22 delo from 1942-1943, declassified on September 28, 1991); **Fond FR-2362: Kurenevka Rayon Administration** (9 opis, 790 delo from 1941-1943, declassified on December 6, 1990); **Fond FR-2361: Pechersk Rayon Administration** (6 opis, 105 delo from 1941-1943, declassified on December 6, 1990); **Fond FR-2363: Central Rayon Administration** (1 opis, 686 delo from 1942-1943.)

The rayon administrations were established in October 1941 by Resolution No. 14 of the Kyiv City Administration.

German occupation authorities ruled through German occupation structures as well as local administration structures. Village, community, rayon and city administrations were set up across Reichskommissariat Ukraine and in the military administration zone that extended to the frontline. Rayons were administered by heads of rayon administrations, and communities were headed by burgomeisters. Communities consisted of several villages, each having its own village elder.

The rayon administration was in charge of overall control of the rayon. All local structures were subject to the rayon administration, which was responsible for the economic performance of the rayon, law and order on its territory as well as the requisition of food for the needs of the Reich and German units stationed on its territory.

The rayon heads were chosen from among "politically reliable" and active supporters of the occupation army and were appointed and removed by the field commandant's office in charge of the operational rear district of the army or group of armies, or, on the Reichskommissariat's territory, by the local commandant's office or by the office of giebtskommissar.

At first, when there was stability at the front and practically no partisan movement activity, there was no shortage of those willing to serve in rayon administrations; the staff was fairly varied, but the executive staff (of administration departments) was selected from among those with previous bureaucratic experience.

The number of departments in rayon administrations varied from one rayon to another: the Kurenevka rayon administration had 12 departments,

while the Pechersk administration had six and the Bogdanovka and Central rayons had three.

The names of the departments spoke for themselves: the Administrative Department monitored the fulfillment of orders from administration heads and burgomeisters; the Inspection, Health, Public Services, Trade and Foodstuffs, Finance and Social Security Departments handled issues in relevant areas.

The rayon administration kept track of the local people, registered new arrivals, collected taxes, looked after army supplies, organized workers, transportation, apartments, etc. They obeyed the orders of German punitive structures when it came to tracking down Red Army soldiers, commanders, commissars, partisans and members of underground organizations, as well as those who sheltered them. The administration was responsible for confiscating arms, ammunition, radio sets and cameras from civilians, as well as black-outs, street cleaning, anti-Jewish restrictions, repressions, etc.

Local structures were controlled by German administration and police structures and were completely dependent on them. Their orders and instructions invariably read: "On the order of the German command."

The fond contain decisions, instructions, orders and protocols of rayon administrations; decisions of the Kyiv mayor; reports from the labor inspectorate; lists of those employed at industrial enterprises and correspondence pertaining to taxes on businesses. It also contains reports from rayon administrations and documents related to their personnel; lists of able-bodied Kyiv residents between the ages of 14 and 45, those unable to work, information about work force reserves, and a count of young people aged 14-16; lists of those entitled for food tokens; statistics pertaining to schools and hospitals, as well as school reports; lists of streets with house numbers and documents on the deportation of citizens to work in Germany.

The rayon administrations stopped functioning in October-November 1943, when the German occupants were driven from Kyiv.

By that time, there were 186,000 people living in the city – one-fifth the pre-war population: 120,000 Kyivans, mainly young people, had been deported to Germany as slave laborers; many of them died in captivity. Languages: Ukrainian, Russian, German.
